

12th Working Groups Meeting of the Scandinavian Sarcoma Group

December, 4-5, 2006

Copenhagen

Program

INTRODUCTION

Welcome to the 12th Scandinavian Sarcoma Group Working Groups Meeting in Copenhagen 2006.

In the first part of the meeting we will get an overview and status of the four planned theses (liposarcoma, leiomyosarcoma, quality of life project and importance of radiotherapy and local recurrence in STS). An update of the SSG registry and proposal for a new protocol for high risk STS (SSG XX) will be given.

The metastasis SSG group will give an overview of the status of the first thesis based on the SSG metastasis register and a planned second thesis.

On the 1st September 2006, it was decided to have a further working group within the SSG organisation and the official name is “SSG Visceral and retroperitoneal sarcoma working group” which will have their meeting on December 5th 2006 from 2 pm to 5 pm. Even this group is multidisciplinary and therefore all interested participants of the SSG working group meeting can enjoy this meeting.

All working groups will discuss patients who are entering the different SSG trials to improve future reporting and quality of trial data.

Our Nordic, multidisciplinary cooperation in the diagnosis, treatment and follow-up of patients with bone and soft tissue sarcoma is unique and we should strengthen that cooperation further.

Thor A Alvegård, Lund

Henrik Bauer, Stockholm

Chairmen for the Scandinavian Sarcoma Group
