INTRODUCTION

Welcome to the 11th Scandinavian Sarcoma Group Working Groups Meeting in Copenhagen 2005. After 10 years of working committee meetings in Stockholm we decided to have our meeting in Copenhagen for the first time and for the first time lasting two days. As you can see in the program the SSG activities have increased immensely in the past 26 years and Denmark is again active within the SSG. Two reasons to have a prolonged working committee meeting and to have it in Copenhagen.

In the first part of the meeting we will get an overview and status of the four planned theses (leiomyosarcoma, liposarcoma, quality of life project and importance of radiotherapy and local recurrence in STS). An update of the SSG registry, proposal for a new protocol for high risk STS (SSG XX) and a proposal for a prospective study – MR evaluation of STS – will be given.

The metastasis SSG group will give an overview of the status of the first thesis based on the SSG metastasis register and possibly a planned second thesis.

All working groups will discuss patients who are entering the different SSG trials to improve in the future reporting and quality of trial data.

Our Nordic, multidisciplinary cooperation in the diagnosis, treatment and follow-up of patients with bone and soft tissue sarcoma is unique and we should strengthen that cooperation further in the future.

Thor A Alvegård, Lund

Henrik Bauer, Stockholm

Chairmen for the Scandinavian Sarcoma Group
