INTRODUCTION

Welcome to the 13th Scandinavian Sarcoma Group Working Groups Meeting in Copenhagen 2007.

In the first part of the meeting we will get an overview and status of the completed thesis regarding (liposarcoma, K. Engström, Gotheburg) and status of the two planned theses (quality of life project and importance of radiotherapy and local recurrence in STS). An overview of “SSG – in the era of GCP” will be given and the importance underlined.

The metastasis SSG group will give an overview of the status of the first thesis based on the SSG metastasis register and a planned second thesis.

During our SSG Annual meeting in Bergen in May, 2007, a new working group was established: “SSG Nursing and physiotherapy working group”. This group will for the first time participate at this meeting.

The “SSG Visceral and retroperitoneal sarcoma working group” will have there second meeting on December 4th 2007, from 2 pm to 5 pm. Hopefully a new SSG recommendation and treatment plan for visceral and retroperitoneal sarcoma will be completed.

All working groups will discuss patients who are entering the different SSG trials to improve in the future reporting and quality of trial data.

Our Nordic, multidisciplinary cooperation in the diagnosis, treatment and follow-up of patients with bone and soft tissue sarcoma is unique and we should strengthen that cooperation further in the future.
