

## **End of inclusion in PAGIST**

*Dear investigator and study nurse/coordinator in SSG XXI (PAGIST),*

We want to inform you that the last patient has now been enrolled in SSG XXI, why no further screening for this trial may be made. At the same time we will remind you to, also in the future, closely follow the protocol for patients still treated within the trial. Since we are rapidly approaching the analysis for the primary endpoint, CBR after 12 weeks, it is very important to get all relevant CRFs promptly.

We thank you for your on-going active and excellent contribution to the trial, and we will come back with reports regarding the results in due time. Especially, several of you will be contacted as potential co-authors.

**With best regards from the SSG secretariat**

**Mikael Eriksson**  
*Coordinating investigator*

**Eva-Mari Olofsson**  
*Administrative secretary*
