Introduction

Welcome to the 17th Scandinavian Sarcoma Group Working Committee Meeting in Copenhagen 2011. Below please find a summary of the issues that will be discussed. In addition, all working committees have their own program and will discuss comprehensively selected topics.

We will receive a report by the Chairman of the register, C. Trovik, on the present status of the SSG central registry. There are concerns linked to certain register data, and the statistician L. Werner Hartman will explain some of them. To further underline the importance of the Central register, the working group will during the meeting come together to thoroughly discuss various problems related to the registration.

Euramos-1 was closed June 2011. K. Sundby Hall will present the recent development of the work on establishing a new international protocol. How to treat osteosarcoma patients in Scandinavia until activation of a new protocol will be discussed.

A new SSG protocol (SSG XXI) will start very soon: Pazopanib in Advanced Gastrointestinal Stromal Tumours Refractory to Imatinib and Sunitinib – A Non-comparative Phase II Multicenter Study. M. Eriksson is the primary investigator and will present the study.

Other studies in which SSG centres participate: hedgehog inhibitors in chondrosarcomas, denosumab in giant cell tumors and multiferon in desmoid tumors and a short review of these studies will be given.

N. Jebesen will present the status of her planned thesis: Effects of surgery and radiotherapy in soft tissue sarcoma of extremities and trunk wall, a SSG project.

The 36th SSG plenary meeting 2013 will be held in Helsinki Oct 9-11th. All subcommittees are requested to discuss proposals for program.

Unfortunately, gaining financial support for the SSG's activities has proved more difficult in recent years. Therefore, it has become necessary to charge a registration fee for attendance.

Notably, our Scandinavian multidisciplinary cooperation is central in maintaining a high quality of diagnosis, treatment and follow-up of patients with bone- and soft tissue sarcoma. We should therefore strengthen such cooperation in the future.

All chairmen of the working committees should send their report from the meeting to the SSG's Secretariat (ssg@med.lu.se) before December 17th, 2011.

The dates for the next Working Committee Meeting (18th) are Dec 2- 4th, 2012. Place: DGI-byens Hotel.
