Preface

We are very pleased to welcome you to the Scandinavian Sarcoma Group's 36th Plenary meeting in Helsinki, October 9-11, 2013.

We are confident that this year's conference will include several speakers discussing topics of high interest to our participants. One of the core themes of the meeting will be the diagnosis and treatment challenges related to children with sarcoma, which will be covered during presentations on both Wednesday and Thursday. Additionally, there will be sessions on giant cell tumors and the latest developments in the use of biomarkers, as well as discussions on new pathological entities and treatment of sarcomas. An update on ongoing and future treatment protocols for bone- and soft tissue sarcomas will also be presented. Lastly, a joint session with nurses and physiotherapists will deal with cancer related fatigue, network focused nursing in teenagers and reconstructive surgery in soft tissue sarcoma. In addition to the keynote speakers, there will be free presentations and a poster session.

We hope that all SSG members and other participants will find the conference valuable and inspiring and take the opportunity to further progress our collaborative work.

We wish you an enjoyable and memorable stay in Helsinki.
