INTRODUCTION

Welcome to the 20th Scandinavian Sarcoma Group Working Committee Meeting in Malmø 2015. As usual all working committees have their own program and will discuss comprehensively selected topics. Four subcommittees (Imaging, Morphology/Tumor biology, Orthopaedic surgery, Medical oncology) will elect/reelect a new chairman during the meeting.

On Tuesday afternoon the Visceral and retroperitoneal sarcoma working group will have their own meeting (as previous years). All information of abdominal- and GIST studies will be given there.

At Monday morning there will be a common session for all members.

The first point on the agenda is of utmost importance! It concerns the future of SSG. It will be discussions and if necessary voting of the proposal of bylaws and reorganization of SSG. The SSG members have received the proposal by email and have hopefully discussed this important task with colleagues at their institutions.

The status for registration of sarcomas in the various Scandinavian countries will be presented. How the situation is for the SSG Central register today will be explained. A presentation of the status for a PhD project based on central register data of Ewing sarcoma will also be presented.

Rick Haas, MD and radiation oncologist from Netherland, who was invited speaker at the Plenary meeting in Stockholm May 2015, has kindly informed us that he will come and present a new protocol (Doremy) of dose reduction of preoperative radiotherapy in myxoid liposarcoma. SSG is invited to participate. We wish him heartly welcome!

The SSG new guidelines for radiotherapy will be finalized during the meeting. They will soon be published on the SSG's website.

Unfortunately, gaining financial support for the SSG's activities has proved more difficult in recent years. Therefore, it has become necessary to charge a registration fee for attendance.

Notably, our Scandinavian multidisciplinary cooperation is central in maintaining a high quality of diagnosis, treatment and follow-up of patients with bone- and soft tissue sarcoma. We should therefore strengthen such cooperation in the future.

The 38th SSG plenary meeting 2017 will be held in Aarhus May 9-11th. Dead line - abstract: February 15, 2017.

All chairmen of the working committees should send their report from the meeting to the SSG's Secretariat (ssg@med.lu.se) before December 16th, 2015.
