Histopathological review

Total 57 cases

SSGXX Two (and last) cases.

Retroperitoneal sarcomas: 45 cases

Difficult and interesting cases: 10 cases

Review in the future

Cases included in new treatment protocols

Review of the cases in the SSG Central Registry with the purpose to increase the amount of reviewed cases in the data base with focus on the last year of production.

Finnish retroperitoneal sarcomas, retroperitoneal liposarcoma and non-lipomatous sarcoma

The next review meeting

The next Working meeting is in Malmö 5.-6. December 2016. There was a discussion of locating the next review meeting in Lund as the same time as the Working meeting in Malmö. Probably if the Department of Pathology will be in redecoration at that time and therefore an alternative is a review meeting in January 2017.

Dinner

We had a nice dinner at Stormkjøkkenet Thursday evening.
