

Register committee meeting, SSG 22nd WC meeting

General discussion

Update of contact persons per center.

Presentation of the annual report, discussion on how to modify it prior to publication.

Divide it into

extremity and trunk wall STS

extremity and trunk wall BS

other sites (Head & neck, abdominal, retroperitoneal, uterus, spermatic cord).

Present the report on the SSG website and the national registers' webpages.

Discussion on the completeness of the national registers, comparison to national cancer registers? All tumor sites?

Discussion on introduction of a tumor prosthesis register.

Suggested changes to the registers

Add

city of surgery

how the size was determined (Pathology report, MRI, CT, other)

Ideas

Discuss with pathology group – which cut off is interesting for necrosis in BS?

Compare outcome between centers in relation to actual given treatment

Compare risk factor patterns in STS between different centers.

Next annual report?

RT for high grade, deep STS only

Surgical margin for high grade lesions in BS (not GCT or grade 1 chondrosarcoma)

Outcome – completeness of FU data, 1 and 5y LR and MFS and OS

-E Styring, chairman
