Introduction

Welcome to the 18th Scandinavian Sarcoma Group Working Committee Meeting 2012 which is the first working meeting to be held in Malmö. As usual all working committees have their own program and will discuss comprehensively selected topics.

At the first day all members are meeting for a common session and following tasks will be discussed:

J. Thorkildsen, Oslo, will present plans for a new PhD project based on SSG register data on low graded chondrosarcoma . It should also be mentioned that the subcommittee of the central register will during the meeting come together to discuss an annual SSG registry report.

K. Sundby Hall will present the recent development of the work on establishing a new international osteosarcoma protocol. Results of ISGSSG II, the protocol on High dose chemotherapy in osteosarcoma, will be presented by K. Boye.

SSG XX will close next year. M. Eriksson will present an international adjuvant protocol and a possible participation by SSG will be discussed.

A short review of the study of hedgehog inhibitors in chondrosarcomas and multiferon in desmoid tumors will be given. Experiences with chest tomography will also be reported.

N. Jebsen will present the status of her planned thesis: Effects of surgery and radiotherapy in soft tissue sarcoma of extremities and trunk wall, a SSG project. M. Ahlstrøm will give us a short review of a research project on various aspects of soft tissue sarcoma.

An important issue for SSG is: How to stimulate/activate the members for SSG work? New and old members are encouraged to give some perspectives under “SSG matters”. The aim for the discussion in this session is to define areas of improvement for SSG.

Unfortunately, gaining financial support for the SSG`s activities has proved more difficult in recent years. Therefore, it has become necessary to charge a registration fee for attendance.

Notably, our Scandinavian multidisciplinary cooperation is central in maintaining a high quality of diagnosis, treatment and follow-up of patients with bone- and soft tissue sarcoma. We should therefore strengthen such cooperation in the future.

The 36th SSG plenary meeting 2013 will be held in Helsinki October 9-11th. Dead line for abstract: May 31st, 2013.

All chairmen of the working committees should send their report from the meeting to the SSG`s Secretariat (ssg@med.lu.se) before December 17th, 2012.
