

Minutes from the register session, SSG WC meeting Malmö dec 3rd, 2019

Annual report

- How long time periods should be presented?
3 or 10 years? What is the goal with the report?
- Overview or in depth?
Agree with overview mainly. Additional in-depth as needed, recommend that it is mainly done as scientific studies.
- Pooling four national registries numbers, manual work.
Takes time, is the interest there for it to be done? The group thinks that the interest is there.

Goal with next year

- Encourage studies – The data in the register is good and should be used and trusted.
- Finalize report in January.
- Prepare next year's annual report, more or less same format.
- Support members willing to do appendices with indepth analysis, although better with publications?

The Swedish visceral registry

- No-one present were willing/interested to take charge of the registry. E Styring will resign at the end of the year. The Swedish visceral and retroperitoneal register will thus probably close by the end of this year.

Emelie Styring
Chairman
