# Preface

---

We wish all members of the Scandinavian Sarcoma Group (SSG) and external guests welcome to our 40<sup>th</sup> congress in Tampere, Finland, April 21-23, 2021. We are excited to announce the participation of several excellent invited speakers, from various European countries.

The meeting will begin Wednesday morning with a workshop on desmoid tumors arranged by SSG together with EURACAN. The participants will get the opportunity to hear about the various diagnostic and therapeutic challenges of this disease and discuss some difficult cases.

Basic research, diagnostics and treatment of bone- and soft tissue sarcoma will be extensively covered throughout the meeting.

A session will be dedicated to immunotherapy, with a focus on why it has not been as effective in sarcomas as in other cancers and how to learn from that when designing new immunotherapy trials in sarcomas.

As a new feature we will dedicate a session to give young Nordic PhD students from all disciplines to present their PhD projects. The idea is not (only) to present completed and finished projects but also projects in the process of being written to create discussions, generate ideas and help the young researchers liaise with other researchers and may be expand their projects and create future collaborations. We hope to receive a lot of abstracts with description of PhD projects for this session. This is a new experiment that can only bear fruits with your encouragement and support.

Additionally, we will pay attention to pediatric sarcomas with a dedicated lecture about fusion sarcomas in the pediatric group and two radiotherapy lectures describing both external beam and brachytherapy in the pediatric group.

The nurses- and physiotherapists program will focus on next generation communication and holistic approach in managing sarcoma patients.

Many of the sessions will be joint sessions between physicians, scientists, nurses and physiotherapists. A collaboration between these groups is important for the development of new treatment strategies for sarcoma patients.

As usual, there will be free presentations and poster viewing sessions.

We hope that all SSG members and other participants will find the conference inspiring and take the opportunity to meet and discuss collaborative work.

We wish you an enjoyable and memorable stay in Tampere!

Akmal Safwat  
Chairman for the Scandinavian Sarcoma Group
