

SUMMARY DISCUSSION FOR IMAGING GROUP SSG WORKING GROUP MEETING 2022

Attendants: Kin Francis Andersen(D), Oskar Angenete (N), Kristine Melhus Bang(N), Hanna Fogel(S),Mats Geijer(S), Seppo Koskinen (S/F), Ingvar Kristasson (S), Arne Lücke(D), Eva Narvestad(D), Maja Sloth(S), Annja T. Viset(N)

1. Joint session with orthopedic surgeons on review of Ewing sarcoma with initial other radiological differential diagnosis.
2. Tumor Imaging protocol. Discussion about MR Imaging of MSK tumor.
 - a. Diagnosis: Small update on SSG recommendations and wish for more easy access on the web site.
 - b. Follow-up imaging after surgery of. Which tumors to follow and what sequences to use. Most use iv. contrast for first follow-up MRI postoperative. Follow-up MRI on all operated tumors preferable not before 3 months postoperative, but often time often dictated by research protocols. Proposed new discussion for next meeting.
3. Soft tissue tumor: Use of ultrasound in screening. Discussion of newer articles. Little experience in the group with ultrasound in radiological evaluation of soft tissue sarcoma. Wish for distribution of articles before eventual new discussion.
4. SSG Imaging Group status. New Leader: Kim Francis Andersen
5. Cases: rare tumor cases from Skåne and Trondheim
