## Introduction

---

Dear SSG member,

We warmly welcome you to the 28<sup>th</sup> Scandinavian Sarcoma Group Working Group Meeting in Malmö 2023.

On Monday morning, we start with the General assembly where the board will present the status and ongoing and planned activities within the SSG.

This year there will be an election for a new board member to replace our treasurer Panagiotis Tsagkozis. He has been treasurer since 2018 and we thank him for all the work he has done for SSG during these years!

On Monday morning we will have a joint scientific program which will follow the general assembly for all participants in some recently developing areas that I hope you will find interesting.

*Kenny Rodriguez Wallberg* will come from the fertility clinic at Karolinska Hospital in Stockholm and talk about fertility preservation in young patients with sarcoma.

Finally, *Claudia Ververde*, chairman of the Spanish sarcoma group GEIS, will give a remotely speech about oncological treatment of sarcoma.

On Monday afternoon and Tuesday morning all working subcommittees will have their own program and will comprehensively discuss selected topics. The working groups will give a short summary of their work on Tuesday morning.

We will also have a multidisciplinary session with presentations and discussions about complicated cases who need multimodality treatment. We hope that this session will be interactive and useful!

On Tuesday afternoon, the Visceral and retroperitoneal sarcoma working group will have their meeting and this year the surgeons from Gothenburg have planned a very interesting program and we hope that as many as possible will participate!

We encourage you to engage in discussions, share insights and connect with other participants and speakers!

I am really looking forward to seeing you all in Malmö!

Christina Linder Stragliotto  
Chair of the Scandinavian Sarcoma Group
