

SSG Newsletter, March 2026

Dear SSG-member!

We were happy to see you at the Working group meeting in Malmö a few weeks ago and we really appreciated the open discussions about the future collaboration within SSG! We had around 100 participants and representatives from all the Nordic countries! It was also the first time that we had a session with the patient advocacy groups. Representatives from Denmark, Norway and Sweden participated and it was interesting to hear how they work and get aspects on the Sarcoma care in our countries. We will continue to collaborate and get input from them in the future! Furthermore, SSG was lucky to get sponsorship from the industry for this meeting, and we sincerely thank all our sponsors!

At the meeting it was clear that we all wanted to continue to meet and collaborate, and we all agree that the working group meetings are the most important meetings but could be extended every second year with some extra time for lectures, presentations or discussion of controversial subjects. Please, don't forget to contact us with new ideas about subjects for discussion!

It was also obvious that a majority of the members want to have the meeting as usual at the beginning of December. The main reason is that the Orthopedic surgeons have another meeting in January which is important and could compete with the SSG meeting. Thus, we plan to have the next WGM at the beginning of December this year but will soon be back with exact dates and location!

We thank Kathrine Pulverer for her contribution to the SSG-board and warmly welcome our new board members Sari Jäämaa, Medical Oncologist from Helsinki, and Dorota Goplen, Medical Oncologist from Bergen. We are looking forward to a fruitful cooperation!

It was also decided that Bodil Engelmann, Copenhagen, and Subash Srivastava, Stockholm, are taking responsibility for the election committee from now on. We thank you a lot for accepting this important task!

We wish you all a wonderful spring!
SSG board
